

Riverside, San Bernardino Counties Mathematics Teachers' Association (RSBCMTA)

Presents:

Exploring the California Smarter Balanced Digital Library

The state of California has created an integrated balanced assessment system to help teachers prepare students for college and careers. To aid teachers in this preparation, the Smarter Balanced Digital Library has been organized. This new library contains vast amounts of information on formative assessment tools and practices and is a key component of the balanced assessment system. The Digital Library is a searchable, interactive, online library composed of instructional and professional learning resources submitted by educators. Each submission to the library has been screened against a set of quality criteria established by education experts and can be counted on to enhance the everyday preparation of your students.

Please join Diana Ceja, RCOE coordinator and president of California Math Council-South as she leads the exploration of the Digital Library. This introduction to the Digital Library will be a valuable source of information for all K-12 teachers.

Please bring your fully charged electronic device (laptop works best) as time will be given for hands-on exploration of the Digital Library. Please obtain your login credentials (user ID and password) from your district's assessment coordinator.

Who should attend: District math curriculum coordinators, department heads, teachers, and content coaches.

DATES: Tuesday, March 17, 2015

LOCATIONS: Riverside County Office of Education
Conference Center
3958 Twelfth Street
Riverside, CA 92501
